Soft skills
- Teamwork
- Effective communication
- Critical thinking
- Problem solving
- Versatile

PROJECTS

Integral Website for León Bicicletas   **PHP & MySQL**

A solution that allows customers to view and quote a wide variety of products filtered by category, accompanied by an administrative panel for store employees in which they can keep track of the inventory of the displayed products, register customers, and perform other functions to manage the store.

MexiSpotlight   **PHP, MySQL & JavaScript**

A website whose objective is to give visibility to local businesses through a digital showcase. Businesses can register to be published with their information and be rated by users.

AccessGuard   **C++, React Native & Firebase**

An IoT project that integrates an Arduino circuit, a Mobile App, and a Website. It consists of an IoT lock with biometric validation that sends all access data to a cloud database to interact with it through the mobile app and website.
